Archimaster 1	vv

## 2 Business informations

### 2.1 Application Overview

Question	Response
What is the cloud migration strategy for this application?	Global Default (Cloud Native)
What are your plans for this application over the next 6-12 months?	Sell - stop using now or in the near future
Has a replacement solution/application been identified?	No
What is the data classification for this application?	Orange Confidential

Who is the audience for this application?	External Only (Partners)
How critical is this application to your organisation?	Medium - Commercial
What is the category of this application (Application or Infrastructure)?	Application
Which Business Unit or Department uses this application? (If not applicable please state N/A)	test
Application description - What is this application used for? E.g. our core accounting package, CRM, HR etc.	None

## 2.2 Product Vendor Information

Question	Response
Application vendor type	Third Party Developed
Is a SaaS version of this application available?	Yes
What is the current Application delivery model?	SaaS
Is there vendor support for virtualised infrastructure and/or cloud services?	No
What development language is the application written in?	COTS
When was the application last updated?	0-12 months

What is the Architecture type for this application	2 Tier Application (Logic built-in to either Data or Presentation Layer)
What is the version number of the application currently deployed	None
What is the licensing model for this application? Per user, per server, per CPU etc?	None
What is the vendors name of the application	None
Is the application internally or externally (vendor) supported?	None
Please provide the application vendor contact details	aaaaaa

## 2.3 Requirements Constraints

Question	Response
What is the application profile (flat, spikes)?	Flat
Does the application have a batch processing demand?	Yes
Is the application subject to compliance or regulatory processes (i.e. - PCI, SOX, ITAR, GDPR etc)?	Yes
Is the application data required to be located within a particular country?	Yes
Does the application require Encryption at Rest and/or Encryption in Transit?	Yes
Does the application have any hardware dependencies in order to function?	None

Does the application have any pre-existing operational issues (performance, stability, etc)?	None
Are there any in-flight projects that could impact the migration/transformation of the application?	None
Does the application have any bespoke remote access requirements?	None
Is there an application refresh policy in place?	None
Are there any specific licensing dependencies for the application to run?	None

## 2.4 End User Information

Question	Response
What type of end-user interface does the application have?	Web Client
How many users does the application have?	500 - 999
What is the total inbound interface count?	None
What is the total outbound interface count?	None

## 2.5 Availability Business Continuity

Question	Response
DR type	None
When is the application in use?	24 x 7
What is the Application Recovery Target Objective (RTO)?	None
What is the Applications Recovery Point Objective (RPO)?	None

## 2.6 Non-Production Information

Question	Response
Can Non-Production environments be taken off-line during non-working hours?	Yes
How many days per month is the development environment is use?	Working hours only
How many days per month is the test environment is use?	Working hours only

## 2.7 Infrastructure Supporting Components

Question	Response
Is the application configured to run in a high availability/resilient configuration?	Yes

Is there a load balancer used for this application?	Yes
Is this application public facing and protected by a firewall?	Yes
How does the Application scale?	Automated Scaling
Does the Application have a requirement for Low Latency?	No

### 3 Cloud Strategy Migration

#### **Recommended strategy : retain**

The 'retain' migration strategy focuses on keeping the current system as it is, without any significant changes, while moving it to the cloud infrastructure.

## 4 Business Case

As we support the transformation, we need to setup relevant business cases. In this business case at least 30 is about the Total Cost OwnerShip TCO.
